

Pioneer DDJ-SX Mapping V 2.0 for Traktor 2.60 by viper9711 4 Decks, 2 FX-Unit's

At first be sure that your Unit is ready in „Mode for OTHER Software“ than Serato DJ
(see Pio-Manual how to change the Mode, Key Lock Btn. has to light up)
Otherwise the Mapping will NOT work !!

Import the Mapping ONLY with the big Import Button otherwise your Effects won't be in
the right order and the FX-Preset's won't work as they should !
After import you'll get 7 Solo Mappings

All main functions are mapped like the printed Labels except:

Slip Btn = Flux Mode ON/OFF **NEW**
Censor Btn. = Show advanced CUE Panel
Panel Select = Layout
CUE Monitor with SHIFT = Deck Flavor
Sampler Volume = Sweet Drama Effect (FX-1)
Browser Knob = List Scroll
Browser Knob PUSH = only Browser Toggle
SHIFT+Browser Knob = Tree Scroll
SHIFT+Browser Knob PUSH = Collapse/Expand Treefolder
Back+Load Prepare = Favorites
SHIFT+Area = Add selected Track to Preparation List
SHIFT+View = Delete selected Track from Playlist (not from Library or HDD)
GRID Adjust: Key Lock ON/OFF **NEW**

HOT CUE Pads Mode:
Hot Cue's 1-8

5-8 SHIFT: Play Mode (Loop/One Shot)

Group 4 Mode: (enable with SHIFT and Sampler Btn.)

1-4: Capture Track from the Deck above
5-8: Slot Unload

Added:

Trackend warning to Censor Led's

SHIFT+Play/Pause: for Deck C+D (easy Stop and Play for the Remix Deck's C+D)

Push Beats Knob toggles between FX Mode Single and Group (faster, no SHIFT needed)

Sorry but Jogwheel Led's are not mapped yet cause I don't know the Led Commands.
Commands from the Manual don't work ☹
